

VOTING SYSTEM

MEMBER GUIDE

How Your Vote is Blind, Secure, and Verifiable

Your voice matters. This guide explains how the LAAPOA Decide system protects your privacy while ensuring every vote counts.

BLIND	SECURE	VERIFIABLE
No one can see how you voted	One vote per member, no changes allowed	Aggregate results are transparent

How Blind Voting Works

The LAAPOA Decide system uses **data separation** to ensure complete voter anonymity. When you vote, two separate records are created in different storage with no connection.

When you vote, TWO separate records are created in DIFFERENT locations with NO connection between them.

STORAGE A — VOTER ROLL (Who Participated)

Records ONLY that a member voted. Does NOT record what they chose.

✓ Johnson ✓ Garcia ✓ Kim ✓ Wright ✓ Bell ✓ Torres

■ NO CONNECTION ■

These storage locations have no shared key, no row alignment, no timestamps in common, and no way to correlate entries.

STORAGE B — VOTE TALLY (What Was Chosen)

Contains ONLY choices. No names, IDs, or identifiers.

Yes No Yes Yes No Yes

WHAT THE ADMINISTRATOR SEES

Total: 6 votes | Yes: 4 (67%) | No: 2 (33%) | 6 members participated

The administrator CANNOT determine which member chose Yes or No.

Vote Types

YES / NO

Straightforward approval or rejection. Examples: ratify a contract, approve a budget. Tap Yes or No to submit.

MULTIPLE CHOICE

Several distinct options. Examples: choose a banquet venue, pick a meeting day. Tap one option to select.

RANKED CHOICE

Express preference across all options. Examples: rank benefit changes, prioritize agenda items. Drag into order; top choice gets most points.

ELECTION

Officer elections with candidate photos and bios. Examples: elect President, fill Board seats. Select up to the number of open seats.

Security Measures

- 1 ONE VOTE PER MEMBER**
Your ID is checked before acceptance. Once voted, a second attempt is blocked at the server level.
- 2 VOTE IS FINAL**
Once submitted, it cannot be changed, retracted, or overwritten.
- 3 AUTOMATIC DEADLINES**
Votes close at the exact deadline. No late votes accepted.
- 4 ADMIN BLINDNESS**
Admins see only totals (e.g., "Yes: 142, No: 58"). They cannot see individual choices.
- 5 AUDIT TRAIL**
Logs record who participated and when, but never what was chosen.
- 6 DATA SEPARATION**
Voter IDs and choices are in separate arrays with no linking key.

MOU-Based Eligibility

Some votes are restricted by MOU. You only see votes for your group.

MOU	MEMBERS	EXAMPLE VOTES
MOU 30/39	APD Officers, Sgts, Lts	MOU-specific policies, Airport directors, union-wide elections
MOU 28	LAPD Municipal Officers	MOU-specific policies, MPO directors, union-wide elections
MOU 65	Park Rangers	MOU-specific policies, Ranger directors, union-wide elections
All MOUs	Every active member	Union-wide elections, contract ratification

How to Vote

- 1 OPEN THE APP**
Visit laapoa.github.io/memberinfo or open the app. Sign in with last name, CID, and DOB.
- 2 TAP DECIDE**
Find the Decide tab between Events and MemBBers.
- 3 READ THE DETAILS**
Each vote has a title and description. Read carefully.
- 4 SELECT**
Yes/No: tap a button. Choice: tap an option. Ranked: drag to order. Election: tap candidates.
- 5 CONFIRMED**
Green message appears: "Your vote has been recorded." Final, cannot be changed.
- 6 RESULTS**
Live mode: see tallies now. Blind mode: results appear after vote closes.

Understanding Results

BLIND MODE	LIVE MODE
Results hidden while voting is open. You see: "Your vote has been recorded." Results appear after close. <i>Best for: Elections, contracts, sensitive decisions.</i>	Results update in real-time. See current totals and percentages while voting is open. <i>Best for: Meeting logistics, surveys, scheduling.</i>

Frequently Asked Questions

Q: Can anyone see how I voted?

A: No. Your choice is in a separate array from your identity. No key or timestamp can link them.

Q: Can the board see my vote?

A: No. They see only totals and percentages. They know you participated but not your choice.

Q: What if I tap the wrong option?

A: Votes are final. Read carefully before tapping. Content cannot be changed.

Q: Can I vote from my computer?

A: Yes. The Decide tab works on any browser.

Q: Why don't I see the Decide tab?

A: The admin may have disabled it, or there are no active votes.

Q: Why don't I see a specific vote?

A: You may not be eligible based on your MOU.

Q: What happens at the deadline?

A: The vote closes automatically. No late votes. Blind results become visible.

Q: Can a vote be reopened?

A: No. A new vote must be created for another round.

Q: Are election votes anonymous?

A: Yes. Same two-list system. Candidate picks are stored separately from your ID.

Q: How does ranked scoring work?

A: 1st choice = most points, last = fewest. All points totaled. Highest score wins.

Your vote is your voice. The LAAPOA Decide system ensures every member participates with confidence that their choice is private, secure, and counted.
